

Pediatrician

Description

Because most of our patients are children, pediatricians play a vital role in evaluating each child's overall health. Their expertise is essential in pre-operative assessments to determine surgical readiness and in post-operative care to ensure safe recovery and family preparedness.

Minimum Qualifications

All applicants must meet the following general requirements:

- Graduate of a university with a medical degree.
- Certified/licensed to practice without restriction in their home country.
- Currently practicing pediatrics or perioperative pediatric care.
- Pediatric Advanced Life Support (PALS) certification (must be current within 2 years).
- Advanced Cardiac Life Support (ACLS) or equivalent is recommended.
- Pediatric specialty training and accreditation.
- In lieu of specialty training, at least 5 years of current pediatric practice.
- Current outpatient and inpatient pediatric experience.

Application Requirements

Applicants must submit the following:

- Completed Operation Smile Volunteer Application.
- Current curriculum vitae (CV) in English detailing education and clinical experience.
- Proof of medical degree and any specialty or fellowship training.
- Current, unrestricted license to practice.
- Current PALS certification (required); ACLS (recommended).
- Background check as required by the Foundation office.
